Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicants will cancel claims to bicyclic heterocycle compounds as group R2. Claims 51-54 and 73, drawn to purine compounds will be withdrawn. Claims 35 and 63 will be amended to delete the bicyclic compounds. This will leave five additional monocyclic heterocycle compounds in addition to the elected 1,3,5-triazine compounds. Applicants cited "Concise Encyclopedia Chemistry" by Mary Eagleson as evidence that the thiol group is -SH. Applicants previous stated that "thioaryl" covers substituted aryl groups such as C₆H₅S-. Applicants agreed that "thioalkyl" means an alkyl group in which a CH₂ has been replaced by sulfur. Thus, both HS-R- and R-S- are intended. Thus, the indefiniteness rejection made in point #7 of the final rejection will be withdrawn.

Applicants are not required to summarize this interview in their next action.
